

Albion

Herefordshire Computing Support

(Formerly Learning and Achievement Service)

Service Level Agreement for Primary Schools and Academies - 2022 - 2023

Summary

As you are likely aware, Mark Sanderson will be retiring from his long respected tenure; presiding over and delivering this valuable service; in partnership with the LA - in March, 2022. Albion is privileged to be offering continuity to Herefordshire Computing Support; available to all Herefordshire primary schools, and widely perceived as a paragon of ICT consultation and best practice.

We believe that retaining and promoting an inter-school culture of collaboration, shared success and knowledge is sacrosanct. Recognising the continuous, exponential evolution of classroom technology and ensuring that trusted guidance and consultation is easily accessible to schools; such that the continuous innovation of digital learning is achievable and sustainable.

We endeavour to continue this eminent legacy by delivering an accessible and collegiate school network, composed chiefly of ongoing teacher development opportunities, a student digital leader programme, and the provision of ICT consultation and support - to all participating, Herefordshire primary schools.

The support service will continue to include termly, ICT consultant practitioner-led workshops for student digital leaders and staff ICT coordinators; culminating in a collegiate, all school digital leader conference.

Costing Structure

The support service is underpinned by an annual, academic SLA; with a cost of £995 per school.

Services Provided

- Student, digital leader programme
- Termly, tri-regional student digital leader and ICT coordinator workshops - delivered by a number of practising teachers and evangelists.
- An annual all school conference/showcase/leadership event.
- Digital skills survey for teachers; to identify areas of opportunity that can inform teacher development and digital learning programme strategies.
- Vision and Planning; a consultative session, for leadership, available either virtually or in-person. Intended to inform and map digital learning objectives.
- A twilight staff development session
- Guidance to accessing self-paced resources; such as Apple Teacher - continuous access to advice for achieving digital learning programme sustainability.
- Measurement and review tools; including annual review meeting with SLT.
- Termly newsletter

Statement Of Interest

If you wish to subscribe to Herefordshire Computing Support; for the upcoming school financial year; please could you state your interest via the form below; to which we will subsequently provide a formal invoice:

Meet Albion West/Herefordshire Computing Support Service

Over the past decade, Albion, as a leading Apple Authorised Education Specialist has been actively involved in supporting Herefordshire's schools with their IT requirements and teacher professional development. The team has deep local knowledge and experience, so is uniquely placed to deliver this new service.

Elliot Broadbent-Jones

Elliot is Herefordshire's local Apple Education Account Manager and Curriculum Specialist. Elliot is also a keen musician, and a great proponent of Apple's creative tools and their scope for fostering unparalleled creativity in the classroom. Elliot has had the great pleasure of working closely with Mark Sanderson over the last decade in support of the former Learning and Achievement Service and is delighted to continue this work with the new Herefordshire Computing Support Service.

John Holder

John is an Apple Professional Learning Specialist with a BA (Hons) in Primary Education; experienced in delivering teacher training for the last 15 years to both Schools and the FE sector. John has been involved in many 1:1 mobile learning projects, supporting schools from the vision and planning phases; to staff development, coaching and student/community engagement.
